

Every exam, where you need it, when you need it.

Every exam, where you need it, when you need it.

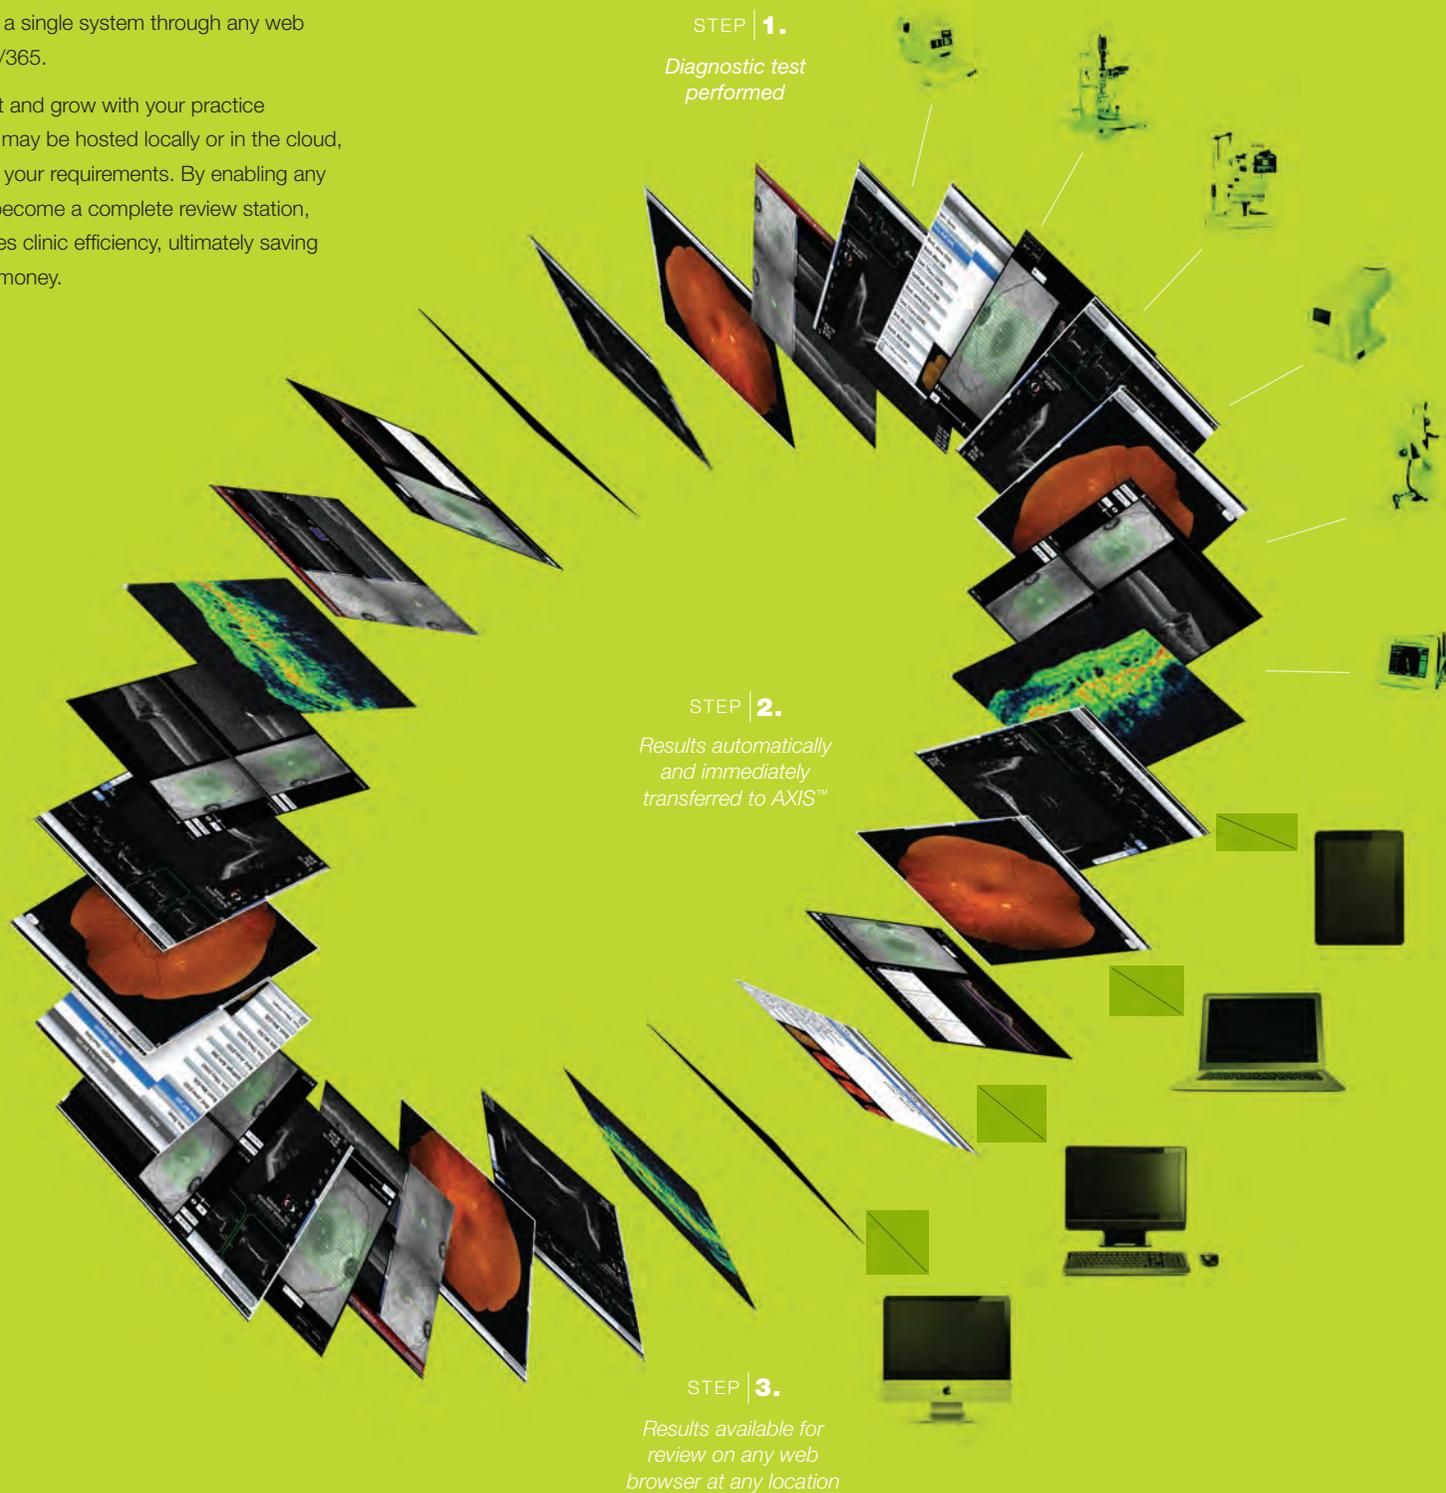

No matter how you look at it, AXIS™ is image management done right

AXIS™ provides unsurpassed image management virtually anywhere, any time. Built on a fast, ultra-reliable technology platform, AXIS™ uniquely allows you to view all patient images from each of your offices in a single system through any web browser, 24/7/365.

Designed to fit and grow with your practice needs, AXIS™ may be hosted locally or in the cloud, depending on your requirements. By enabling any computer to become a complete review station, AXIS™ improves clinic efficiency, ultimately saving you time and money.

Seamless device integration facilitates efficient exams transfer:

AXIS™ Connectivity

AXIS™ takes connectivity and networking to a whole new level by allowing you to review exams anywhere you have an Internet connection. Away from the office? No problem. AXIS™ is there.

Complete Integration

With the touch of a button, still images, reports, and videos from all of your devices, from any of your locations, are viewable to the entire practice within moments. What's more, AXIS™ can smoothly transfer all of your existing imaging data from another image management system.

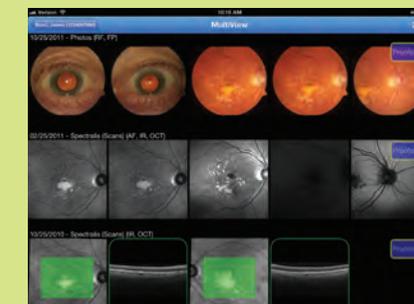

EMR Integration

AXIS™ is compatible with nearly any EMR system. Secure access to diagnostic images are made available from a click of a button within the EMR itself.

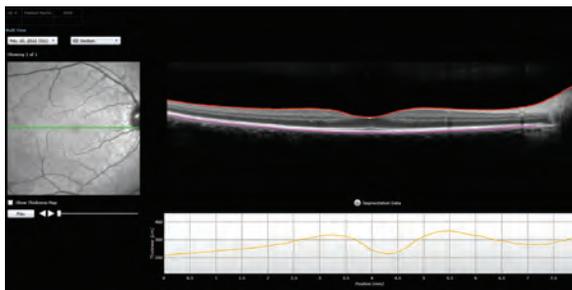

AXIS™ iPad App for "On-The-Go" Access

The expertly designed AXIS™ iPad app provides yet another way to view your exams from AXIS™ without being tethered to a computer. Utilizing the graphics power of an iPad, AXIS™ delivers sharp images with the detail you need.

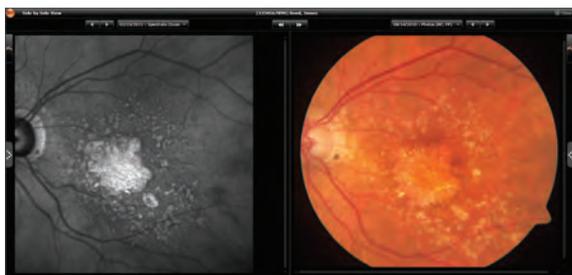

Extensive Review Tools

When it comes to comparing and analyzing diagnostic exams, AXIS™ provides advanced features and capabilities that go above and beyond the scope of typical image management systems.

OCT Scan Review With AXIS™, limited viewing of OCT reports is a thing of the past. AXIS™ allows you to view OCT scans one by one, with compatible OCTs, on any computer anywhere.

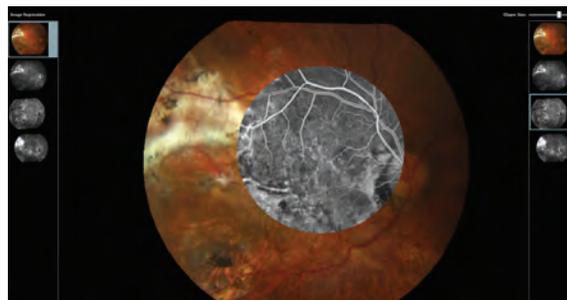

Serial Comparisons AXIS™ allows ongoing comparison of complete patient exam history, side by side, in order to aid clinical decision making.

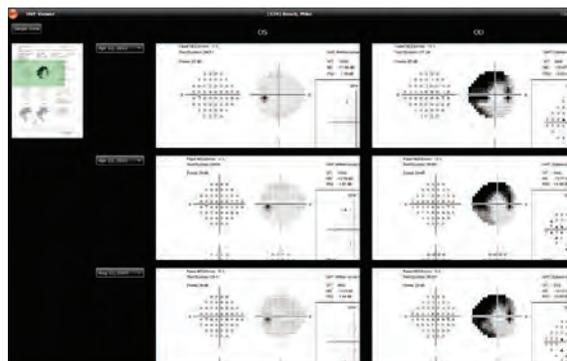

Image Montage Sophisticated algorithms within AXIS™ Montage software take multiple unique fields of view of the retina and blend them together in a single image. The result? A complete, at-a-glance, wide angle view.

Annotation Tools Standard manipulation, annotation, and measurement tools are integrated directly into AXIS™ such as zoom, brightness/contrast, drawing, and PDT measurements.

Registration and Overlay AXIS™ registration view perfectly aligns and overlays all your diagnostic images, including FA, ICG, FAF, RF, SLO, and color in a single adjustable window. Registration gives you a clear view of your treatment options.

Visual Fields History AXIS™ offers extra insight with the ability to simultaneously view a patient's visual fields across time on one screen.

AXIS™ Image Management, available any time, anywhere

- iPad and browser-based points-of-access ensure constant availability to complete exam records when and where they're needed, regardless of physical location
- Fast and efficient with immediate access to results from all diagnostic device modalities
- Scaled to meet the unique needs of each practice with hosting options for every environment
- Seamless integration with EMRs
- Fully HIPAA-compliant
- Supports user authentication against a domain via LDAP
- Provides AXIS™ logins for referring physicians to view only their exams
- Easy export of images for presentations
- Upload external, scanned or legacy images directly into AXIS™ via built-in interface
